Long before e-mail, Internet, talking computers and jolly jargon, Sandy Berman was out there doing his best to link the world with old-fashioned letters to more friends than the Library of Congress has headings. His hard-hitting polemics, whether they be for political, racial, sexual or ethnic causes, have enforced the idea of librarian as activist. It all adds up to an exhilarating intellectual who has profoundly shaken our ideas of what libraries and librarians are all about--From Bill Katz's Foreword. For nearly four decades Sandy Berman has been the embodiment of the activist librarian, championing the causes of intellectual and personal freedom with a seemingly boundless supply of energy. His work to rid the Library of Congress subject headings of bias is legendary, but it is perhaps his encouragement and prodding of fellow librarians to broaden their vision of the profession that most counts. Here many of his friends and associates (Fay M. Blake, Martha Cornog, Elaine Harger, Zoa Horn, E.J. Josey, Will Manley, Noel Peattie, Norman Stevens and 24 others) reflect on what Sandy has meant to them and the profession.

Who doesn’t have questions about God? But where in the world can you go to get answers? Eric Metaxas has been there, so he gets it. Which is why he’s written this shockingly down-to-earth book on the big questions everyone asks (but not always out loud). Totally conversational and sometimes flat-out hilarious, this book asks: * How can a good God create a world that has evil and suffering? * Is God anti-sex? * Doesn’t science make God obsolete? * What’s the real story on miracles? * If God is everywhere, why go to church? * Don’t we already have God within us? * Isn’t God too busy running the universe to care about the details of my day? These questions (and many more) get no-nonsense answers that don’t hide behind dull theological language. So get the lowdown (and more than a few laughs) on what are probably the most important questions anyone has.
Everything You Ever Wanted to Know About Rugby But Were too Afraid to Ask explains the often-baffling laws of modern sport in a light-hearted and easy-to-understand way to the new fan/spectator or the 'sport widow'. This is a witty, off-the-wall guide to the rules of the modern game, as if written by a very patient but understanding friend. Writer Iain Macintosh explains how rugby works and why it is so popular, and reveals the history of the sport. He guides the novice through the basic rules of the game in a bouncy, easy-to-fathom style, but also explains the fast-changing pace of the modern game that has made it even more compelling. If you've ever been terrified by phrases like 'ruck and maul', or never quite understood the legalised 'bundle' that is a scrum, this book will remove the mystery and explain all you ever needed to know about rugby, but were too afraid to ask.

'A modernist work of art is by definition 'incomprehensible'; it functions as a shock, as the irruption of a trauma which undermines the complacency of our daily routine and resists being integrated. What postmodernism does, however, is the very opposite: it objects par excellence are products with mass appeal; the aim of the postmodernist treatment is to estrange their initial homeliness: 'you think what you see is a simple melodrama your granny would have no difficulty in following? Yet without taking into account the difference between symptom and sinthom/the structure of the Borromean knot/the fact that Woman is one of the Names-of-the-Father you've totally missed the point!' if there is an author whose name epitomises this interpretive pleasure of 'estranging' the most banal content, it is Alfred Hitchcock (and—useless to deny it—this book partakes unrestrainedly in this madness).' Hitchcock is placed on the analyst's couch in this extraordinary volume of case studies, as its contributors bring to bear an unrivalled enthusiasm and theoretical sweep on the entire Hitchcock oeuvre, from Rear Window to Psycho, as an exemplar of 'postmodern' defamiliarization. Starting from the premise that 'everything has meaning', the films' ostensible narrative content and formal procedures are analysed to reveal a rich proliferation of ideological and psychical mechanisms at work. But Hitchcock is here to lure the reader into 'serious' Marxist and Lacanian considerations on the construction of meaning. Timely, provocative and original, this is sure to become a landmark of Hitchcock studies. Contributors: Frederic Jameson, Pascal Bonitzer, Miran Bozovic, Michel Chion, Mladen Dolar, Stojan Pellko, Renata Salecl, Alenka Zupancic and Slavoj Zizek.

It is the author's belief that, while almost everyone has heard of E=mc2, very few people really know much about it. Unfortunately most books on the subject either require a knowledge of higher mathematics, or they leave too much inadequately explained. In this book the author attempts to steer a middle course, explaining the subject as fully as possible yet keeping it easy-to-understand.

We all have questions about Jesus, but very few of us get the answers we're looking for if the answers even exist! Do they? Where (in heaven's name) do you go to find out? Challenging the widely-held assumption that Slavoj Žižek's work is far more germane to film and cultural studies than to literary studies, this volume demonstrates the importance of Žižek to literary criticism and theory. The contributors show how Žižek's practice of reading theory and literature through one another allows him to critique, complicate, and advance the understanding of Lacanian psychoanalysis and German Idealism, thereby urging a rethinking of historicity and universality. His methodology has implications for analyzing literature across historical periods, nationalities, and genres and can enrich theoretical frameworks ranging from aesthetics, semiotics, and psychoanalysis to feminism, historicism, postcolonialism, and ecocriticism. The contributors also offer Žižekian interpretations of a wide variety of texts, including Geoffrey Chaucer's Troilus and Criseyde, Shakespeare's The Merchant of Venice, Samuel Beckett's Not I, and William Burroughs's Nova Trilogy. The collection includes an essay by Žižek on subjectivity in Shakespeare and Beckett. Everything You Always Wanted to Know about Literature but Were Afraid to Ask Žižek affirms Žižek's value to literary studies while offering a rigorous model of Žižekian criticism. Contributors. Shawn Alfrey, Daniel Beaumont, Geoff Boucher, Andrew Hageman, Jamil Khader, Anna Kornbluh, Todd McGowan, Paul Megna, Russell Sbriglia, Louis-Paul Willis, Slavoj Žižek

In his earlier book, Eric Metaxas tackled the questions people had always wanted to ask about God. His book was well-received, but Metaxas soon realized there was a long list of questions that still needed to be addressed. In Everything Else You Always Wanted to Know about God..., the author answers the rest— and some of the very best—of the questions that surface when God is the topic of conversation. Metaxas’ s welcoming tone and his skillful use of humor lower readers’ defenses. He presents biblical truth in the form of engaging answers that can’t help but connect, whether the reader is an inquisitive skeptic, an open-minded agnostic, or even a new believer looking to get grounded in the basics of the Christian faith. No matter who is asking the questions, this sequel delivers the goods with disarming candor and biblical authority.

"This book, written mainly with the non-Italian reader in mind, addresses a central problem in textual criticismnamely, how to try to correctly reconstruct a text of the past so that, even if not identical, it is as close as possible to the lost original, starting from a number of copies more or less full of mistakes; that is to say, how to preserve part of the memory of our past."--Preface, p.
